Introduction

This project is a **Christian quiz app** designed to educate and test users on various aspects of the Orthodox Christian faith in a fun and engaging way. The app includes questions on topics such as Saints , The Bible , Rites , Monasteries , Church History , Church Leaders

Goals

1. To save the correct real orthodox faith
2. To promote knowledge of Orthodox Christian faith and traditions.
3. To provide a fun, interactive way for users to learn about our faith.
4. To encourage deeper exploration of religious teachings and history.

Planned Features (Final Version)

- User-friendly interface (Desktop Application)
- Lots of different interesting questions (arabic language)
- Different type of questions (multiple choices , boolean)
- Question categories : Saints , The Bible , Rites , Monasteries , Church History , Church Leaders
- Score tracking
- Dark Mode and some themes
- Setting

Current Version (Prototype)

A **terminal-based prototype** has been developed to demonstrate the core quiz logic and user interaction. It displays a few questions (in english bec. The terminal) and the choices of it then it asked the user to enter number from 1 to 4 and see if the user choice is valid or no and it told him if his answer was true or false and display final score . This version showcases the basic functionality that will be carried over to desktop app version.

Technologies Used

I. Prototype (Terminal App):

- Python
- Some Python's built in library

II. Final App :

APP :

- Python
- Tkinter and CustomTkinter
- Some Python's built in library
- Some external Libraries

DATABASE :

- Json files
 1. Store the question
 2. Store the user's score

OTHER:

- Github - Google Drive
- Microsoft Edge
- ChatGPT
- Deepseek
- ETC...

Why This App?

.There are very few digital resources that present Orthodox Christian knowledge in a quiz format. Our app fills this gap by making faith-based learning accessible and funny , especially for young people.

Current Status

I have completed a basic prototype and I learned custom tkinter and start developing the main app. I are excited to move forward.
